

# Field Placement

A distinctive feature of the programme is the 6-month field placement.

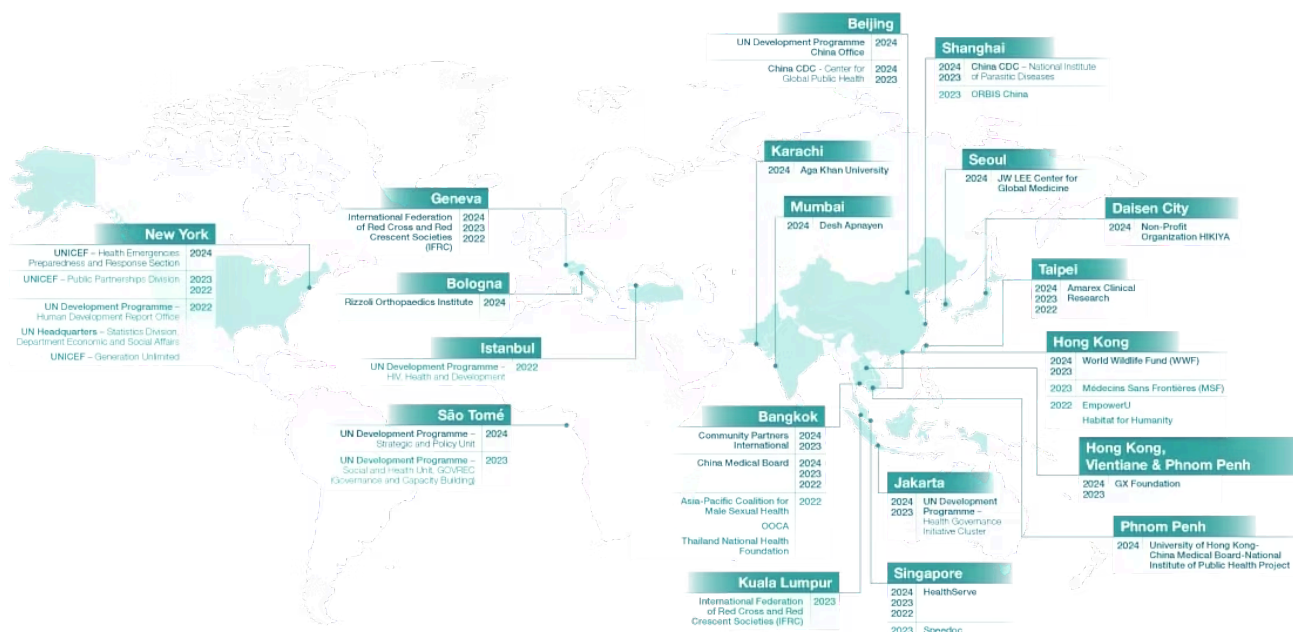

Students will gain exposure to real life challenges and have the opportunity to receive mentoring from leading global health and development organisations such as UN agencies, Non-governmental Organisations (NGOs), Philanthropic Foundations and more.

In addition to offering expert guidance and professional training workshops, HKU provides a limited number of scholarships to support students during their placements.

We currently have opportunities for students to undertake placements in a range of organisations and locations depending on their interests and long term career goals.

For potential students who wish to know more about the BASc(GHD) programme admission information, please visit the [Admission Page](#). Scroll down for BASc(GHD) students' sharing on their placement journey!
